

Qumulo Advanced Training Services

Overview & Benefits

Adding a new storage system to your infrastructure can be disruptive. Team members need time to familiarize themselves with the new technology. Qumulo advanced training services will quickly bring your team up to speed on how to manage Qumulo File Fabric (QF2) and integrate it into their environment.

This on-site training session was developed by Qumulo and is led by Qumulo instructors. It is designed to answer all the questions your storage administrators might have.

Training Description

This is a hands-on training session that covers all aspects of administering QF2, from building a cluster to enforcing quotas.

Duration

One eight-hour session on site for up to 10 students.

Training Session Outline

The training includes but may not be limited to:

- QF2 technology overview
- Hardware and networking
- Installation and maintenance
- Shares, exports and quotas
- Snapshots and continuous replication
- Data analytics (machine intelligence)
- Qumulo API
- Support via Qumulo Customer Care

Requirements

- Conference room with projector
- Participants to bring laptops with Qumulo OVA downloaded and Internet access
