

# Qumulo Installation Services

## Overview & Benefits

Running an IT department involves many more far reaching concerns than installing storage. Let Qumulo help get your QF2 system operational so you can focus on larger strategic objectives. We will install and configure QF2 quickly so you avoid unnecessary issues and delays.

## Installation Services Include

- Collecting site survey data and evaluating your environmental and technical site readiness
- Complete on-site installation of the QF2 cluster and basic cluster configuration
- Conducting a QF2 orientation session

## Key Activities

Action	Responsibility
Kickoff call	All
Site survey	Customer
Site readiness review call	All
On-site installation	Qumulo consultant
On-site orientation session	All

## Scope

- Up to one eight-hour session on site for installation and knowledge transfer engagement
- Installation of up to 10 nodes
- Orientation session of up to two (2) hours

## Exclusions

- Installation on servers that are not Qumulo-certified hardware configurations
- Installation of servers, switches, and/or networking equipment
- Implementation or configuration of customer network
- Advanced performance testing or tuning
- Loading, management, or manipulation of the customer's data

## Requirements

- Administrator (root) access to QF2 installations
- Key customer personnel (such as network architects, network engineers, and network administrators) are available to provide information and to participate in review sessions, workshops and other information gathering activities
- Conference room with projector
