Qumulo Systems Health Check

Overview & benefits

Any IT environment represents a complex and rapidly changing set of challenges for the team responsible for it. You may find that though your original deployment met your needs, industry changes, new business requirements, additional workloads, or new users may have changed the dynamic of your infrastructure, and it may not function as seamlessly as you originally experienced.

A Qumulo systems health check can ensure that your Qumulo system is still implemented and deployed in the best possible way for your business. When you periodically evaluate the configuration, capacity, and performance of your Qumulo system, you can be confident that you're getting the best possible value from your investment.

Services include:

- Thorough assessment of your Qumulo system
- Configuration optimization and performance improvement planning
- Onsite implementation
- Assessment report including configuration details, findings, recommendations, and implementation results

Key activities

Action	Owner
Kickoff Call	All
Technical audit and analysis	Qumulo consultant
